Taif Helly

Junior fullstack web developer & Project Manager

I am a junior fullstack web developer with a strong technical foundation in HTML, CSS, JavaScript, React, SQL and Python, combined with several years of experience working in agile environments and cross-functional teams.

I bring over three years of experience in project management and agile methodologies, which I aim to complement with my newly developed fullstack web development skills. By bringing together technical skills and an understanding of team and project processes, I strive to contribute as a link between development teams and stakeholders, while growing in a Junior Web Developer role.

Previous positions

2024-2025 Project Manager, Anticimex.

2023-2024 Assignment Manager/Scrum master, Scania.

2022-2022 Change leader/process owner, ITS Nordic

2015-2016 Event Manager, People Partner

Skills

Agile (Scrum master, Kanban & SAFe), Six Sigma & DMAIC, Lean management, ISO 9001, ISO 14001, ISO 27001, 3D blender, Microsoft office, Git & GitHub, Python, PowerBI, HTML, CSS, JavaScript & React.

Keywords

Project Management, Scrum Master, Agile (Scrum, SAFe, Kanban), ITIL Processes, Risk Management, Business Process Optimization, Cybersecurity, Six Sigma, Data Analysis, Stakeholder Management, Python, Jira, Process Mapping, Supplier, Budget Planning, Leadership, Change Management, MS Projects, Cross-functional collaboration, Blender.

Junior Web Developer & Project Manager 0739144013 taifhelly@hotmail.com

Education

Bachelor's Degree – Industrial Engineering & Management (180hp)
Uppsala University (2019–2022)

Currently - Web developer full stack open source

Nackademin (2025-2027)

Technical Skills

- **Frontend:** HTML, CSS, JavaScript, React, Responsive Design.
- **Backend (basic):** Python, API integration, Node.js (basic)
- **Databases:** MySQL, MongoDB (basic)
- **Tools:** Git, GitHub, Jira, VS Code
- **Other:** Agile/Scrum, Power BI, basic UX/UI

Web Development Curriculum

In my Fullstack Web Developer Open-Source program, I study core modules including Frontend 1 (HTML, CSS & JavaScript) and Frontend 2 (JavaScript frameworks & responsive design).

I also learn Backend 1 (Node.js & server-scripting), Backend 2 (TypeScript + API integration), and Database Techniques (MySQL & MongoDB). The curriculum further covers Application Lifecycle Management, modern CMS development, and includes a significant LIA (internship) period to apply my skills in real projects.

Work Experience

2024-2025 PROJECT MANAGER, ANTICIMEX GROUP

Tasks

Led and coordinated cross-functional projects to ensure alignment with business objectives while conducting audits of global subsidiaries to assess efficiency and compliance. Implemented Scrum to optimize workflows, enhance collaboration, and drive efficiency across teams. Managed manual penetration testing to identify security vulnerabilities and develop mitigation strategies, strengthening cybersecurity. Utilized Power BI, advanced Excel, and Python for data analysis and reporting improvements, enabling data-driven decision-making. Applied Six Sigma FMEA standards for risk management, ensuring projects stayed on track with minimal disruptions. Oversaw ITIL-based change management, incident handling, and service optimization to maintain seamless IT operations. Additionally, managed source code workflows using Git and GitHub, ensuring structured version control and collaborative development processes.

As a technical project lead, collaborated closely with developers to design and implement internal web tools using HTML, CSS, python and JavaScript, ensuring alignment between technical implementation and business needs. Contributed to UX/UI improvements and technical documentation to support agile delivery.

Contribution

- Introduced structured agile work methods ("Way of Work"), improving project execution
- Enhanced security measures through in-depth vulnerability assessments, reducing cybersecurity risks.
- Improved stakeholder communication by developing clear reporting structures and structured meeting frameworks.
- Collaborated with developers to design internal web tools using HTML, CSS, JavaScript, and Python.
- Led initiatives to resolve critical project blockers, minimizing downtime and ensuring smooth project progress.
- Conducted audits of global subsidiaries to align operations with Anticimex Group expectations and demands.

Outcome

Successfully implemented Scrum and agile practices, increasing project efficiency and reducing delays. Strengthened IT security through risk mitigation strategies, enhancing cyber resilience. Improved data visualization and reporting accuracy, enabling better executive decision-making. Minimized project blockers and operational inefficiencies, leading to faster resolutions and optimized workflows.

Keywords: Project Management, Agile Leadership, Scrum, ITIL Processes, Business Process Improvement, Cybersecurity, Six Sigma (FMEA), Microsoft IaaS, Python Automation, JavaScript, CSS, html, Git version control & GitHub collaboration.

2023-2024 Assignment manager/Scrum master, Scania

Tasks

Developed and implemented project plans to structure and drive projects toward defined goals, ensuring alignment with strategic objectives. Introduced and customized Jira to streamline workflows and integrate agile methodologies such as Scrum and SAFe in R&D and production. Led a waterfall-driven transformation project for Sweden's fire trucks, manufactured by Scania, with a budget exceeding 5 million SEK. Managed supplier selection, price negotiations, and the implementation of improved solutions using technical tools like CIM, FRAS, and OAS. Facilitated effective cross-functional communication between designers, production teams, sourcing managers, SQA, and stakeholders to promote collaboration and clarity. Additionally, addressed critical blockers to swiftly resume project deliveries and ensure continued success. Collaborated closely with production teams to ensure that the integration of new materials and changes to production lines did not disrupt the workflow. Maintained effective communication to ensure smooth and uninterrupted operations.

Contribution

- Facilitated Agile transformation by implementing Scrum methodologies and support other scrum masters, which improved efficiency both within my team and across other teams in production.
- Optimized supplier selection, achieving a cost saving of 200,000 SEK per week for Scania production globally.
- Coached and guided teams to overcome obstacles, fostering a transparent and adaptive work environment.
- Conducted risk analysis and process improvements in production, leading to increased workflow efficiency.
- Identified and resolved production blockers, optimized the management of project meetings, and enhanced archival processes with suppliers to achieve more effective results.

Outcome

Improved workflow optimization and stakeholder engagement, leading to higher project success rates. Proactively identified and resolved issues in production, significantly reducing project delays. Enhanced cost efficiency through strategic supplier management and effective price negotiations. Strengthened collaboration among cross-functional teams between R&D and production, resulting in increased productivity and smoother project execution.

Keywords: Production, Scrum master, Agile Coach, Jira & Atlassian Tools, Risk management, Process optimization, cross-functional teams, communication, waterfall projects.

2022 CHANGE LEADER/PROCESS OWNER, ITS NORDIC

Tasks

Mapped and analyzed business processes within production to identify inefficiencies and opportunities for improvement, conducting comprehensive process mapping to visualize workflows and identify bottlenecks in production streams. The production operations primarily leverage Microsoft cloud solutions to support other businesses. Developed sustainability reports aligned with the Global Reporting Initiative (GRI) framework to enhance corporate sustainability practices. Additionally, assessed internal competencies and provided strategic recommendations for targeted training initiatives to support workforce development.

Contribution

- Identified key process inefficiencies, leading to a 20% reduction in lead times in production.
- Visualized solutions using 3D tools and mapped all solutions comprehensively.
- Introduced and implemented digital agile solutions to enhance workflow efficiency.
- Strengthened sustainability reporting efforts by aligning with GRI standards.
- Conducted competency assessments to support strategic workforce development.

Outcome

Achieved a 20% reduction in lead times through process optimization and successfully implemented automation tools to enhance operational efficiency. Improved reporting capabilities, supporting better sustainability practices, and strengthened team competencies by providing targeted training recommendations for skill development.

Keywords

Process mapping, Business process optimization, Digital transformation, Sustainability reports, GRI, Change management, Trello.

2015 - 2016 EVENT MANAGER, PEOPLE PARTNER

Tasks

Planned and executed a variety of events tailored to different target groups and needs while conducting risk assessments to ensure safety and quality. Managed customer relations, encouraging active client participation in event planning to optimize execution. Maintained fast-paced and effective communication to ensure seamless coordination and successful event delivery.

Contribution

- Developed structured event plans, ensuring seamless execution and high customer satisfaction.
- Conducted risk assessments to mitigate potential event-related issues.
- Optimized event workflows and documentation, leading to a more streamlined planning process.
- Established clear communication channels to improve coordination and responsiveness.

Outcome

Successfully executed multiple high-quality events, enhancing customer engagement and satisfaction. Reduced planning inefficiencies by implementing structured workflows and improving communication strategies. Strengthened safety and quality measures through comprehensive risk assessments, ensuring smooth and secure event execution.

Keywords

Event planning, risk assessment, Process optimization, Customer engagement, workflow improvement.

Employment

2024 – 2025 ANTICIMEX GROUP

2023 – 2024 SCANIA

2022 – 2022 ITS NORDIC

2015 – 2016 PEOPLE PARTNER

About me

I'm highly motivated by learning and building new things. Whether it's through coding, 3D printing, or small robotics projects, I enjoy turning ideas into functional solutions. I stay up to date with the latest technology and continuously implement it into my personal projects.

Education and certification

2019 – 2022
Industrial engineering & Management, Uppsala University of Technology (bachelor).

2020

- Lean Six Sigma Yellow Belt.

2025

- PSM1, Professional Scrum Master I
- GIT, Git Essential Training
- Programming, Programming Foundations: Fundamentals.
- Microsoft Azure fundamentals (AZ-900) Cert Prep by Microsoft Press
- Preparatuib course programming A
- **Currently**: web developer fullstack open source (Vocational Collage)

Languages

Swedish – Fluent
English – Fluent
Arabic – Fluent
